Objective

Final-year **Computer Science (Cyber Security)** undergraduate seeking an entry-level role as a **Software Engineer / Full Stack Developer**. Strong foundation in **data structures, object-oriented programming, REST API development, and secure application design**. Hands-on experience building **scalable full-stack applications** using **React, Flask, and Python**, with applied knowledge of cybersecurity principles.

Education

Education

B.Tech – Computer Science and Engineering (Cyber Security) G H Raisoni College of Engineering and Management, Pune	2022 – 2026 CGPA: 6.93/10
HSC – Indira Gandhi Memorial High School, Beed SSC – Gurukul English School, Beed	2020 – 2022 2020

Experience

Software Developer Intern Disha Technologies (Hybrid)	Dec 2025 – Present
- Working as a full-stack developer on client-based software projects. - Developing and enhancing features based on client requirements. - Performing bug fixing and feature enhancements. - Assisting in building and integrating REST APIs. - Conducting testing and QA validation. - Collaborating with clients and senior developers.	
Cybersecurity Intern Techverse Upskill E-Learning, Pune	Apr 2025 – May 2025
- Conducted vulnerability assessments using Nmap, Wireshark, Burp Suite. - Performed penetration testing and CTF simulations. - Worked extensively in Kali Linux environments.	

Projects

JusticeAssist – AI-powered Cybercrime Reporting Platform	2025
- Designed and developed a full-stack web application using React and Flask. - Implemented NLP-based AI models for cybercrime classification and evidence extraction. - Integrated PDF report generation and interactive dashboards. - Applied secure system design, authentication, and input validation. Tech Stack: React, Flask, Python, NLP, REST APIs	
Social Media Threat Analyzer	2024
- Built a Python-based OSINT tool for detecting phishing, impersonation, and fake accounts. - Applied sentiment analysis and behavioral pattern analysis for threat identification.	
Password Hash Cracker	2023
Implemented dictionary-based attacks on weak hash algorithms (MD5, SHA-1) for security demonstration.	

Certifications

- Full Stack Developer Certification – **FreeCodeCamp** (2025)
- Security, Compliance, and Identity Fundamentals (SC-900) – **Microsoft** (2025)
- Azure Fundamentals (AZ-900) – **Microsoft** (2025)

- Cybersecurity Job Simulation – **Deloitte (Forage)** (2025)
- Complete Python Bootcamp – **Udemy** (2023)

Technical Skills

Programming Languages: C++, C, Java, Python, JavaScript, Bash/Shell

Web Technologies: HTML, CSS, React, Flask, REST APIs

Databases: MySQL (Basic), SQL

Cybersecurity Tools: Kali Linux, Wireshark, Burp Suite, Metasploit, Nmap

Developer Tools: Git, GitHub, VS Code, Linux

Activities

- **Security Analyst – AR/VR Club (GHRCEM):** Analyzed vulnerabilities in immersive systems.
- **TryHackMe Level 4:** Completed red-team and blue-team cybersecurity labs.
